📍 Tanta, Egypt (Ready to relocate) | 🛡 Military: Completed

Profile

Professional Full Stack Developer with robust expertise in building scalable, modern web applications using C#, ASP.NET Core, and Angular 21. Completed an intensive Full Stack development program at the Information Technology Institute (ITI). Directed Agile teams of 5 developers through the full software lifecycle, implementing Clean Architecture, CQRS, and MediatR. Delivered highly responsive applications and scalable database solutions while integrating cutting-edge AI technologies (RAG, Agentic Software) to optimize performance and drive measurable business outcomes.

Education

Higher Institute of Engineering and Technology

Bachelor's degree in Computer and Control Engineering

Kafr-Elshiekh, Egypt

Aug 2019 – Jul 2024

– **Cumulative Grade:** Excellent with Honors

Internship

Information Technology Institute (ITI) - MCIT

Full Stack Web Development using .NET (4-Month ITP)

Tanta, Egypt

Jan 2026 – Present

- Developed robust back-end applications and RESTful APIs using C# and ASP.NET Core, implementing Clean Architecture, CQRS, and MediatR to ensure scalability.
- Constructed dynamic front-end architectures utilizing Angular 21 and TypeScript, significantly improving UI responsiveness and overall user experience.
- Integrated cutting-edge AI capabilities into applications, leveraging Generative AI APIs, RAG (Retrieval-Augmented Generation), and Agentic software workflows.
- Designed and managed relational databases utilizing Microsoft SQL Server and Entity Framework Core, optimizing complex LINQ queries for high-performance data retrieval.
- Collaborated effectively within Agile environments, managing source control via Git and deploying containerized applications using Docker.

Information Technology Institute (ITI) - MCIT

Backend Web Development using .NET, 1-month Program, Summer Code Camp (SCC)

Mansoura, Egypt

Jul 2023 – Aug 2023

- Programmed RESTful APIs using ASP.NET Core and C#, achieving 100% successful integration with front-end components.
- Applied data access logic using Entity Framework Core, accelerating query execution times by 15%.
- Tested APIs systematically using Postman, ensuring zero critical failures during the deployment phase.

Work Experience

Outlier

AI Linguistic Model Trainer (Freelance)

Remote

May 2024 – Oct 2024

- Evaluated Generative AI language models across 50+ iterative cycles to improve output accuracy and logical reasoning by 25%.
- Conducted structured testing of linguistic models, exhibiting high attention to detail in data annotations.
- Enhanced overall AI performance for large-scale datasets by applying advanced prompt engineering techniques.

Projects

AI-Powered Real Estate Management Platform (Ongoing) | *ASP.NET Core, Angular 21, Redis, Semantic Kernel, n8n*

- Architected a comprehensive property management system utilizing a Modular Monolith architecture, integrating CQRS and MediatR to ensure a scalable and loosely coupled backend.
- Integrated Redis for advanced data caching, significantly optimizing data retrieval speeds and overall platform performance.
- Incorporated AI capabilities into property management workflows, leveraging Semantic Kernel and n8n to automate tasks and enhance operational efficiency.

Vortex (Multi-Vendor E-commerce Platform) | *ASP.NET Core, Angular 21, SQL Server, Stripe/PayPal*

- Designed the core database schema and developed the full RESTful API for the product catalog, cart, and checkout pipeline using ASP.NET Core.
- Built a dynamic front-end shopping experience and role-based dashboards (Admin, Seller, Customer) utilizing Angular 21 and reusable components.
- Integrated Stripe and PayPal for secure transactions, and managed the complete order lifecycle with automated stock deduction.
- Integrated an external Email Service into the order pipeline to trigger automated HTML-formatted notifications upon status changes.

Ecobazar (Front-End Organic Food Store) | *JavaScript, HTML, CSS, DOM Manipulation*

- Developed a client-side e-commerce platform collaboratively, overseeing the software lifecycle from conception to final product.
- Designed user interactions and decreased page load time by 35% through optimized JavaScript DOM manipulation.
- Collaborated alongside graphic designers and teammates to implement web design features across 3 distinct user dashboards.

Student Management System | *ASP.NET Core MVC, SQL Server, Entity Framework, Identity*

- Built a centralized back-end system managing records and academic tracking for a database of 500+ students.
- Enforced user authentication methods to protect sensitive data, achieving 0 security breaches during testing.
- Executed secure CRUD operations and data validation utilizing SQL Server database technology.

AI-Powered Floor Plan Generator (Graduation Project) | *Python, React, Three.js, GANs*

- Developed an automated layout generator using Python and GANs to optimize architectural space utilization.
- Integrated the AI model with RESTful APIs, processing user constraints and visualizing results in under 2 seconds.
- Reduced manual drafting time by an estimated 40% by automating the sketch phase via Computer Vision techniques.

Blood Bank Management System | *ASP.NET Core MVC, Entity Framework, SQL Server, Bootstrap*

- Deployed a web application to manage donor records and track 1,000+ daily blood inventory units.
- Executed complex SQL queries to track expiration dates, improving inventory tracking efficiency by 25%.

Accomplishments

- **Academic Excellence:** Ranked 2nd among the 2024 graduating class in Computer and Control Engineering.

Skills

- **Technical Skills:**
 - **Back-End & Architecture:** C#, ASP.NET Core (Web API, MVC), .NET, Python, Entity Framework Core, LINQ, SignalR, Clean Architecture, CQRS, MediatR
 - **Front-End Technologies:** Angular 21, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap
 - **Databases & Tools:** Microsoft SQL Server, MySQL, Redis, Git/GitHub, Docker
 - **AI Integration:** Generative AI APIs, Prompt Engineering, RAG (Retrieval-Augmented Generation), Agentic Software, Semantic Kernel, n8n
 - **Core Competencies:** OOP, Data Structures, Design Patterns, RESTful APIs, Agile Methodologies, Team Leadership, Problem Solving
- **Language Skills:**
 - **Arabic:** Native
 - **English:** B1 (Intermediate)
- **Interpersonal Skills:**
 - **Problem Solving & Analytical Thinking:** Demonstrate a strong power of analytical reasoning to translate complex problems into practical, cost-effective solutions.
 - **Organizational Skills & Attention to Detail:** Methodical in planning and performing tasks with consistent accuracy and a meticulous approach to detail.
 - **Team Leadership & Communication:** Inspire team cooperation and communicate clearly to achieve mutual understandings and organizational goals.
 - **Time Management & Prioritization:** Excel in priority determinations to maximize time effectiveness and deliver results ahead of schedule.
